BRDA

## *We believe*

in the power of nature. On the beautiful slopes of Brda where the warm Mediterranean climate meets the cool night breezes from the Julian Alps, we cultivate high-quality grapes on Opoka soil, a mixture of marl and sandstone from ancient oceans. This unique terroir allows us to produce a variety of elegant wines with pronounced mineral character and freshness.

## *We believe*

in sustainability, and as guardians of this magnificent land we are committed to preserving its vitality and producing wines that reflect the unique identity of Brda. Protecting ecosystems in our vineyard for future generations is a deeply held value and responsibility for us. We see it as our duty to society and our region.

## *We believe*

in our wines because we believe in our grapes. At Marjan Simčič Domaine, we cultivate organic grapes using natural methods passed down from our great-grandfathers. In the cellar, we preserve traditional vinification methods and continue to build on the knowledge and wisdom of winemaking from each generation. Marjan aims to push the limits of Ribolla by producing natural wines in a traditional way.

## *We believe*

there is truth in wine. Each of our wines reflects the distinctive signature of Marjan Simčič – telling the story of the magical Brda region and the love that connects us so strongly with it. We believe that this story flows in every glass of our wine.
