

Iconic Wine

Pinot Gris Shapeshifter Mendocino County

For over 70 years, the Nelson family has been farming in Mendocino. Since 1952 they have not just been growing grapes, but Bartlett pears, plums, Christmas trees, and even raising grass-fed sheep who are allowed to graze in the vineyards during the winter. They are a true farming family with three generations living on and caring for the property just north of Hopland. The Pinot Gris grown here was planted over twenty years ago. The loam soils and valley heat produce a particularly concentrated style with lots of color for this variety. One could be forgiven for mistaking it for Pinot Noir when walking the vineyard.

Grape varieties Pinot Gris

Tasting notes

This wine will continue to pick up body and a golden color, making it a wine that's always evolving, not just in complexity but in color as it ages.
