

Quadrum Wine Company

Quadrum Rosé

Location: Vineyards located in the southern subzone of La Mancha, surrounding the city of Ciudad Real.

Grape varieties 50% Tempranillo, 50% Gamacha

Soil Sandy soils intermixed with small chunks of limestone. The surface is intermixed with iron rich red clay.

Tasting notes

Quadrum Rose is a blend of Spain's two most important Spanish indigenous red varieties, Tempranillo and Gamacha. The dry hot climate in La Mancha is ideal for both of these varieties to achieve proper ripeness without having to use any harmful sprays. The naturally balanced Gamacha expresses ripe red fruit while holding a crisp acidity and the Tempranillo offers structure and spice.
