

Tolaini

Vallenuova Chianti Classico Riserva **DOCG**

2023 marks the first vintage of Vallenuova Riserva, a new wine born from the evolution of Tolaini's former Vallenuova Chianti Classico. The vineyards surrounding the winery, now more mature and well-established, produce grapes of greater depth and complexity, making this step forward in quality possible.

Grape varieties 100% Sangiovese?

Soil Alberese limestone. The soils come from hard, marly limestone, a compact sedimentary rock rich in calcium carbonate that is typical of some of Tuscany's most prestigious vineyard sites. As this limestone weathers, it breaks into a stony, mineral-rich, low-organic-matter soil that offers excellent drainage, limits vine vigor, and encourages deep rooting for lower yields and greater concentration.

Tasting notes

Complex and compelling, offering a mix of pure black cherry and black currant fruit, with earth, spice, and leather flavors. Lush and balanced, presenting a long, tobacco-tinged finish.
