

Domaine Philippe Livera

Gevrey-Chambertin 'En Champs' Vieilles Vignes

The vineyard at "En Champs" is located partway up the mid-slope of the hill, just under the premier cru of Champeaux. The village of Brochon, the heart of Gevrey-Chambertin, is right nearby. Limestone is predominant in the soil here, which results in a great minerality in the wines. After hand-harvesting, destemming, and fermenting with natural yeasts in tank, the wine is aged in older French barrels. Approximately 40% new wood is used.

Grape varieties Pinot Noir

Altitude 300m ASL

Soil Limestone substratum with chalky topsoils and marl
