

Villota

Villota Tinto

Location: Laserna, a small village located on the Ebro River in the municipality of Laguardia, in the province of Álava. Rioja Alavesa sub-zone.

Vineyard: Finca San Rafael, owned and cultivated by the Villota family since the 1930's. The vineyard is distributed on three terraces that slope gently towards the Ebro River.

Viticulture: Traditional dry-farmed manual viticulture, without the use of systemic herbicides, fungicides, pesticides, or fertilizers. Vines cultivated primarily "en vaso" or goblet style head trained vines.

Grape varieties 84% Tempranillo, 11% Graciano, 5% Garnacha

Altitude 340m-430m ASL

Soil Primarily of calcareous iron-rich clay, with a high percentage of limestone, and with a deep reddish color. Thousands of years ago the site was covered by the river, and over the years it deposited canto rodado, or galets, across the whole vineyard. Today, certain parcels are completely covered by an impermeable surface of canto rodado, or rolled river stones.
